

ANAGHA K

Junior Software Developer

✉ anagha1720@gmail.com

☎ +918139036716

Dedicated junior software developer with 1.8 years of experience specializing in PHP and WordPress development. Proficient in customizing WordPress themes and plugins, optimizing website performance, and implementing responsive designs using HTML, CSS, and JavaScript. Skilled in developing dynamic, user-friendly websites and ensuring seamless content management solutions. Experienced in translating design prototypes into high-quality code, collaborating with cross-functional teams, and leveraging tools like React.js and Git to deliver robust and scalable web applications.

Experience

Junior Software Developer at CloudEcho Systems

May 2023 - Present

- Designed, developed, and implemented dynamic websites using WordPress, and PHP, improving website performance and functionality.
- Customized and managed WordPress content management systems to create engaging, user-friendly web experiences.
- Developed new user-facing features and reusable components using React.js, ensuring robust and maintainable code.
- Worked with popular React.js workflows such as Flux and Redux, effectively managing application state.
- Skilled in JavaScript, HTML, and CSS, with expertise in translating designs and wireframes into high-quality, responsive code.
- Integrated RESTful APIs and implemented modern authorization mechanisms like JSON Web Token for secure and efficient data handling.
- Optimized components for maximum performance across various web-capable devices and browsers, ensuring a seamless user experience.
- Strong team player with experience using front-end development tools such as NPM and version control systems like Git.
- Developed and maintained dynamic, responsive web applications using React.js, CSS, and HTML, enhancing user experience and reducing load times.
- Utilized TypeScript to enhance code quality and maintainability, ensuring type safety and reducing runtime errors.

Intern in Python Development at Iroid Technologies

Oct-2022 - April 2023

- Developed and maintained web applications using Python and Django, ensuring robust and scalable backend functionality.
- Created responsive and user-friendly web interfaces using CSS and Bootstrap, enhancing the overall user experience.
- Designed and implemented RESTful APIs with Django Rest Framework to enable seamless data exchange between the frontend and backend.
- Utilized SQL to create, modify, and query databases, ensuring efficient data retrieval and manipulation.
- Conducted unit testing and debugging to identify and resolve issues, ensuring the delivery of reliable and high-performance applications.

Education

Kannur University

- Master of Computer Applications (MCA) 2020 - 2022
- Bachelor of Computer Applications (BCA) 2017 - 2020

Skills

- WordPress
- Html,css,javascript
- php
- AWS -Cloudformation
- Figma
- python (Django)
- React.js
- Git
- Jira
- Java
- C++
- Database Management Systems (DBMS)
- Linux
- Software Engineering
- Data Structures
- Cybersecurity
- Operating Systems
- Computer Networking
